Aspiring Front-End Software Engineer with a strong foundation in JavaScript, HTML, and CSS. Skilled at translating user needs into responsive, accessible, and visually engaging web applications. Experienced in applying troubleshooting, problem-solving, and user-focused communication to deliver effective technical solutions.

Skills

- Advocacy
- CRM
- Debugging & Troubleshooting
- Team Collaboration (Agile / Remote)
- SEO
- Responsive Web Design
- Git / Version Control
- Problem Solving & Adaptability

Work History

Customer Support Specialist

The Home Depot

May 2022 - Current

- Resolving an average of 50+ inquiries daily, maintaining a consistent customer satisfaction rate. Also, I proposed and implemented a new internal feature used by over 5,000 coworkers to streamline communication.
- Communicating complex information clearly to improve customer understanding, showcasing a strong user-centric approach to support.

Software Developer Mentor

FIRST Robotics

March 2023 - April 2024

- Introduced the team to structured version control using **Git and GitHub**, enabling centralized collaboration and reducing time spent comparing local code versions, which **improved team development speed by approximately 10%**.
- Collaborated with mentors to improve the team's coding workflow, resulting in faster iterations and clearer documentation.
- Mentored students in building and styling robotics-related web dashboards to visualize sensor data and system performance.

Site Administrator

Indie WordPress Blog

December 2020 - December 2023

- Designed and maintained a WordPress website with a focus on **SEO** optimization, responsive layout, and accessibility.

- Implemented keyword strategies and metadata improvements that increased site visibility in search engine results.
- Published and formatted multimedia content using HTML and CSS, ensuring consistent design and readability across devices.

Front-End Web Developer

Personal Portfolio Website, <https://aks48.github.io/Amaudre-Portfolio/>

May 2024 - Current

- Implemented a consistent color scheme to establish a professional and cohesive personal brand identity.
- Optimized page structure and layout for accessibility and faster load times across browsers and devices.
- Continuously enhancing and iterating on site design and functionality based on user feedback, performance metrics, and evolving web development standards.

Education & Certifications

Codecademy

Front-End Engineer — Certificate November 2024

- Built **responsive and interactive web applications** using HTML, CSS, and JavaScript, emphasizing modern design principles and usability.
- Focused on professional web design, ensuring **accessibility standards**, consistent styling, and visually engaging user interfaces.

Udacity

Introduction To JavaScript — Nanodegree January 2024

- Built a solid foundation in JavaScript fundamentals, including data types, variables, objects, and arrays, to create dynamic and interactive web applications.
- Completed hands-on projects reinforcing best practices, efficient coding techniques, and key programming paradigms.

Metropolitan Community College at Kansas City, Missouri

Computer Science Expected in May 2027

- Currently enrolled in advanced mathematics courses, sharpening logical and analytical skills essential for software development and problem-solving.
- Actively engaged in one-on-one programming tutoring to build foundational knowledge of software algorithms, data structures, and best coding practices.
- **Dean's List, GPA: 3.2**

LinkedIn Learning

JavaScript For Web Designers — Certificate May 2023

- Integrated real-world APIs such as Bing Maps to add interactive, data-driven features to sample projects, demonstrating a **25% improvement in accessibility and functionality** across prototypes.
